

DATASHEET

Never Overpay for What You Ordered

Keep a handle on your inflight service operations costs

Eliminate paper and save money through unprecedented accuracy

Receive caterer invoices electronically

Introduce reverse invoicing where appropriate

Validate every item on the invoice automatically

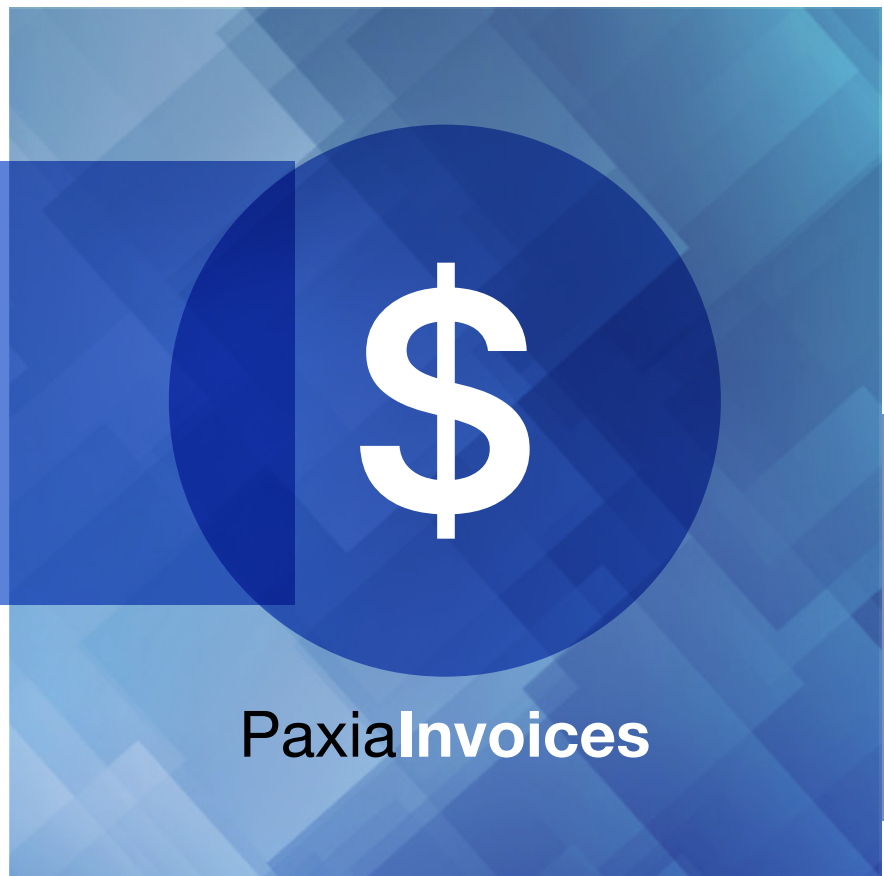

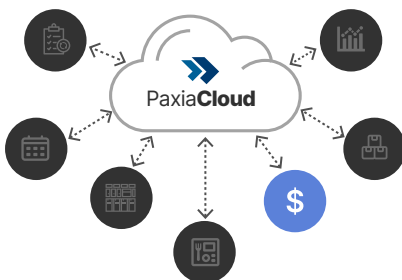

Check that quantities are as expected

Check that prices are as agreed

Apply airline-determined audit rules and tolerances

Resolve discrepancies online

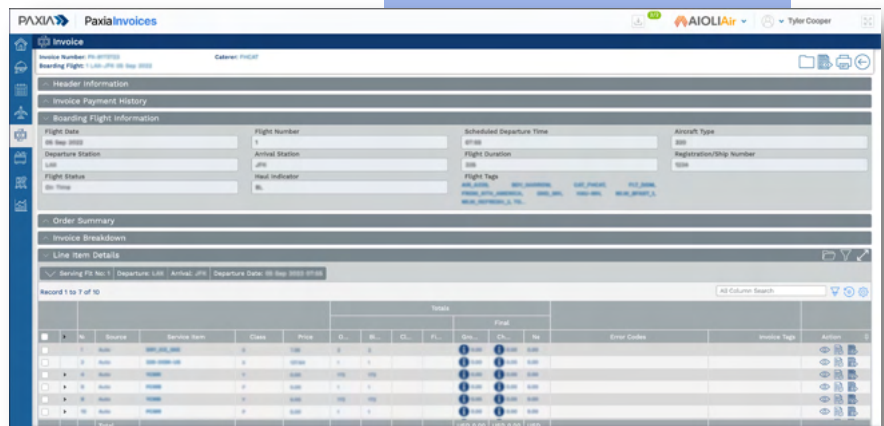

Integrate with airline AP/GL systems

PAXIA INVOICES

Accurately Account for All Supplier Charges

Part of the Paxia Cloud catering management platform, Paxia Invoices validates orders and generates invoices for all orders that are in completed status. It completes the loop of controlling an in-flight service operation. It is responsible for validating invoices being raised by suppliers by either receiving a system interface from the supplier or by reverse invoicing, which generates the invoice on behalf of the supplier. Get invoices on a flight-by-flight basis or grouped into any date range. You get a sophisticated range of tools that simplify managing one of the highest spending areas for an airline.

FEATURES

Get the Details You Need, When You Need Them

Dashboard

- View a quick snapshot of the items that require the user's attention, such as 'Invoice pending review,' 'Recently updated invoice,' and 'Rules'

Invoice

- Locate an invoice or invoicing period
- Create recurring invoice templates and check the status of retroactive price requests

Invoicing Rules

- Add, review, edit, and delete invoicing rules
- Control everything from auto-approving discrepancies to generating rejections and cost liability of a delayed or canceled flight
- Create tax and general ledger mappings

Administration

- Manage all data that is core to supporting Paxia Invoices
- Configure back-office structure such as invoicing periods by stations and setting up taxes/fees/discounts, etc.

Discover What You Can Do with Paxia

Find out how you can improve productivity, reduce operational costs, increase profitability, and remain competitive with Paxia Cloud.
