

DATASHEET

Ordering Made Easy

Generate meal orders with a push of a button

Increase information for your caterers to reduce meal shortages

Improve caterer's ability to meet special and crew meal orders

Deliver better information for gate agents to manage the flight

Reduce the day-to-day involvement of airline field personnel in service ordering

Standardize flight attendant-friendly boarding document

Offer proactive management of meal adjustment factors, reducing over-catering

Provide operational reporting to monitor the performance of caterers and the accuracy of meal adjustment factors

Allow all service orders to be invoiced electronically, reducing the cost of processing

PAXIA ORDERS

Efficiently Manage All Your Flight Orders

Integrated with the Paxia Cloud platform, Paxia Orders offers a complete set of tools to manage the entire life cycle of an airline service order efficiently. Paxia Orders is used by airlines and caterers to generate meal orders for operating flights while presenting costs in an easy-to-manage format that enables agreement on the payment amount.

FEATURES

Simplify Your Ordering Process

Dashboard

- View quick snapshots of the items that require the user's attention, such as orders pending approval, the current status of orders/flight events, or passenger numbers
- Search using criteria such as flights that depart at a particular station during a specific time range

Order

- Locate orders using search criteria such as caterer, order number, flight number, date range, and order status
- Create a new order for an entire flight leg
- Import multiple orders from an Excel template

Reports

- Learn more about your operational efficiency and effectiveness by comparing estimates to actuals

Flight Service Schedule (FSS)

- Access the query-released FSS option, which allows viewing the most current FSS
- Manually generate new orders against an existing flight

PAX Adjustment

- Create, administer, test, and search for rules that auto-adjust passenger counts

Administration

- Access polling policies which drive the system in many aspects like order creation, status change, etc.
- Import passenger counts, SPMLs, etc.

“ I love that I have the ability to automatically submit service orders and operational updates to my caterers and that my caterers are able to submit confirmation of orders and actual load counts—all within a single catering system. ”

Discover What You Can Do with Paxia

Find out how you can improve productivity, reduce operational costs, increase profitability, and remain competitive with Paxia Cloud.
