## CHALLENGE

### Hard-to-Manage Catering Schedules. Multiple Flights. Specific Business Rules.

Efficiently managing flight catering schedules in the aviation industry is challenging. Airlines often grapple with complex scheduling requirements, diverse service offerings, and the need to meet passengers' varying expectations. Additionally, optimizing service assignments while keeping costs in check can be demanding. Ensuring accurate demand forecasts and maintaining consistent communication with caterers and supply-chain partners are additional hurdles. Moreover, the intricate web of rules governing service assignments necessitates a system that can streamline the rule creation and validation process.

SOLUTION

# Easily Facilitate the Efficient Allocation of Catering Services to Flights

Paxia Schedules automates service assignments based on pre-defined rules to achieve greater efficiency and cost control. You can communicate consistently with caterers and supply-chain participants, enhancing collaboration and smoother operations. Accurate forecasting, simplified rule management, and detailed reporting capabilities improve decision-making and resource planning. Ultimately, the module empowers airlines to navigate the intricate landscape of flight catering schedules, ensuring a more streamlined and cost-effective operation.

BENEFITS

## Powered by Paxia Schedules

Paxia Schedules empowers you to manage flight catering schedules efficiently, reduce costs, and enhance communication with caterers and supply-chain participants. The automation, flexibility, and reporting capabilities contribute to smoother operations and improved resource planning.

### Cost Control

Gain control over costs by optimizing service assignments and minimizing the total number of catering events and active catering stations

### Efficiency

Streamline scheduling and rule enforcement, reducing manual workloads and ensuring consistent service assignments

### Clear Communication

Facilitate communication with caterers and supply-chain participants, enhancing collaboration

### Accurate Forecasting

Provide data for accurate service demand forecasting, improving resource planning

### Automation

Automate the service assignment process, reducing the risk of errors and saving time

### Flexibility

Offer exceptions to standard rules to meet specific requirements, ensuring adaptability

### Comprehensive Reporting

Produce various reports for better decision-making and performance analysis

Paxia Cloud—One platform for all your catering management and onboard service needs. Visit us at [paxiasolutions.com](http://paxiasolutions.com) and discover what you can do with Paxia.
